Project proposal template

This template is provided to help you in developing your own project proposal . You are expected to develop your software engineering project proposal using your own content.

Title: Give a meaningful title. An example could be ``To design and implement an automated data processing system''. This is just one of many possible project titles.

Problem: Explain the problem you are trying to solve in one paragraph. An example could be ``As a growing business, the manual execution of data poses a significant challenge to your privacy and security. Inconsistency in results is a major risk that many businesses face due to this approach, as well as inefficiencies, lower productivity and increased labour costs.''

Solution: Describe the solution for solving the problem. An example could be ``We propose the development of a Data Center Automation project that will automate your current approach in data collection, storage, analysis, transformation, and visualisation. This enables you to go through the different stages of data management with minimal errors through an advanced program that ensures accuracy and continuity in your business processes.''

Objectives: State the objectives of your project in a few bullet points. An example could be ``With this project, we intend to achieve the following: (a) develop and deploy a data automation system by [date] and (b) ensure the effectiveness and security of the data automation system throughout the project period.''

Benefits: Explain the benefits of the project to its customer. An example could be ``The proposed data center automation project will help your company maintain consistency in your results. By automating the process of data management, you obtain benefit from its long-term sustainability.''

Timeline: List an estimate timeline here. An example is given below:

Phase	**Description**	**End date**
Phase 1	Data collection & system development	[Date], [Month], [Year]
Phase 2	System development	[Date], [Month], [Year]
Phase 3	System support & maintenance	[Date], [Month], [Year]

Action plan: The action plan lists the specific activities that you will undertake to achieve the objectives you specified under the **Objectives** section. An example activity plan is given below:

Objective 1: To develop and deploy a data automation system

Action	Assigned to	Deadline	Progress
Set up a database application	Name of group member 1	[Date], [Month], [Year]	In-progress or completed
Install an automation technology	Name of group member 2	[Date], [Month], [Year]	In-progress or completed
Host and deploy the technology	Name of group member 3	[Date], [Month], [Year]	In-progress or completed

Objective 2: To ensure the effectiveness and security of the data automation system

Action	Assigned to	Deadline	Progress
Manage the technology and content	Name of group member 1	[Date], [Month], [Year]	In-progress or completed
Conduct updates, bug fixes, and modifications	Name of group member 2	[Date], [Month], [Year]	In-progress or completed
